

Brett Etheredge recently transferred from the Central Coast of California to Stantec's Hawaii Geomatics team to assist in the management of the Survey QA/QC process for HART's light rail project. With more than eight years of experience, Brett brings a wealth of knowledge and a broad range of survey projects including topographic surveys, construction staking, ALTA surveys, boundary retracement, aerial surveys, utility mapping and terrestrial scanning. Recently, Brett obtained his Hawaii PLS and is working on incorporating UAS datasets with his knowledge of 3D point cloud postprocessing and mapping deliverables.
